Machine Learning, Spring 2019: Exercise Sheet 8

This is not really an "exercise" sheet, it's rather an invitation to play an interactive ML video game. Just visit the page

http://playground.tensorflow.org

and hit some buttons, then watch.

This is a wonderfully designed playground for visually experiencing MLP training. Try to understand how the visual effects on this page relate to the material taught in the lecture, and … play.

☺ ☺ ☺
