Abstract

In dit voorbeeld wordt een aantal elementen uit LaTeX getoond: graphics, vergelijkingen, en bibliografische referenties komen aan de orde.

1 Introduction

Bla bla bla zoals onderzocht in [2]. Output (action) is determined by

$$A_t = \mathcal{F}(A_{[t_0,t-\delta t]}, P_{[t_0,t]}) \tag{1}$$

where $P_{[t_0,t]}$ is the perceptual history, $A_{[t_0,t-\delta t]}$ is the action history of the agent which came into existence at t_0...

2 Method

Bla bla in Figuur 1 we see ....

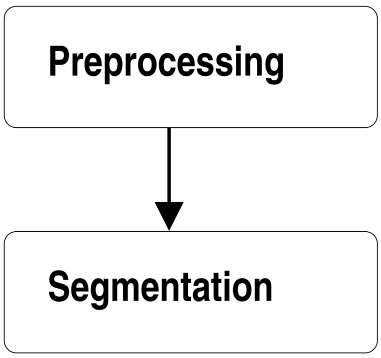

Figure 1: Een schema

3 Results

Bla bla. The concept of metastable states [1] has been thorougly ...

4 Conclusion

It was ok.
